Good Afternoon Richard,

Apologies for the delay, but copies of the data gathered are attached to this email. The location of the posts used are also included.

I did look at Main Street Hemington, but the devices I use require posts to attach them to, and I couldn't find anything suitable in Main Street. We do not use wooden posts and we haven't any devices capable of use with the tubes across the road technology.

The 85th percentile, the speed at or below which 85% of all traffic is travelling, is fairly high in Hemington and Luddington, and you might want to mention this to the police who enforce speed limits where possible, but traffic numbers were low.

Thurning had a low 85th percentile, but I did look further into the maximum speeds shown, and a lot of these were at the same time and date and travelling in the same direction, so it was either somebody deliberately speeding or machine error.

If you want to pursue a VAS Scheme further, please come back to me.

Yours,

Steve B

Dear Steve

I was wondering what progress you had managed to make on this matter. Councillors did report some boxes visible on the main road in Hemington, but were concerned that Main Street (which is the principal residential street) should also be surveyed. Other villages did not report seeing any boxes.

It would be useful to have some data to consider before our next meeting in January if possible,

Many thanks

Richard Allinson FCA
